

Checking my blood pressure

Staff will check my blood pressure.

Blood comes from your heart and moves around your body.

When blood moves around your body it is called blood pressure.

Staff need to check your blood pressure to see if you are sick.

Staff check your blood pressure with this machine.

Staff will put the strap on your arm. The strap will fill up with air.

The strap will feel tight on your arm but it will not be sore.

Staff will put a clip on your finger.

When it is over, staff will take off your strap and clip.

Staff will write down what your blood pressure and heart rate are.
