

What is Coronavirus?

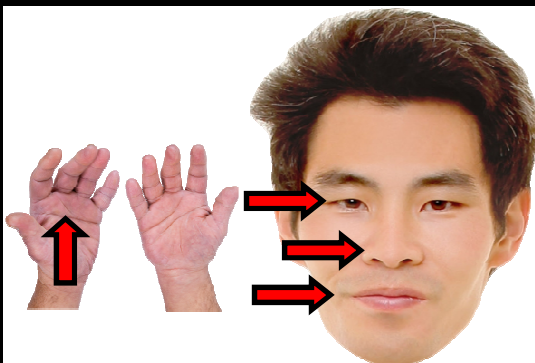

Coronavirus is a virus.
Some people call it
Covid 19.

A virus can make you
sick.

A virus is very small.
You can't see a virus.

A virus lives on your
hands and in your nose
and mouth and eyes.

A virus can pass from person to person.

A virus can be spread when you cough and sneeze.

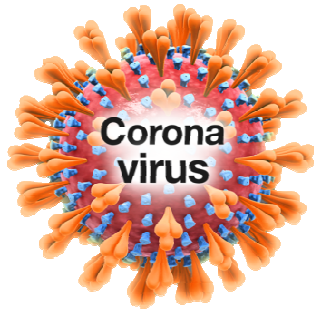

It can spread when you talk to someone and stand close to them.

It can spread when you touch other people like shaking hands.

It can spread when you touch things that other people have touched.

People who have
Coronavirus will have:

A cough

A temperature.

Find it hard to breathe.

If I am sick I will get a
test for Coronavirus.
